

The Mouse Plague is a Potential Threat to your Business

Mice are returning in force to various parts of Australia, posing a threat to your business and facilities. It is vital to pro-actively take action to eliminate the risk of a mice infestation. Ecolab Pest Elimination are an expert in rodent control and remain an essential service provider during COVID restrictions.

HOW CAN WE ASSIST?

With more than 30 years of experience, our higher standard and guaranteed results give you confidence you're doing everything possible to maintain a safe, healthy, pest-free business.

With our pro-active and comprehensive rodent program, we:

- **Inspect and monitor** rodent activity in and around the business
- **Respond to interior rodent activity** aggressively to eliminate infestation
- **Consider and place different device types** such as curiosity traps, bait traps and dual action stations
- **Provide Ongoing consultation** to review findings and recommendations of Corrective Actions
- Ensure measures are **safe, effective, humane, compliant** and **identified** a device location plan

WHAT CAN YOU DO TO PROTECT YOUR BUSINESS?

- **Secure the Exterior** of your business by minimising the presence of food, water and harbourages
- **Create barriers** to minimise introduction points to your facility
- **Reinforce the interior** of your business by minimising conditions that support pest activity such as product spillage or standing water

Contact us today to protect your business from the Mouse Plague, Our Service Specialists are ready to assist
